# In Cab Entertainment

Radios, radio cassette players and CB radios all feature in the impressive line up of in-cab entertainment from Leyland.

Each item carefully selected for design and reliability. Each fully supported by a range of accessories to ensure easy installation and maximum performance.

Whatever the requirement, Leyland have a unit to satisfy the most discerning driver from budget priced push button radios to top-of-the-range electronic tuned radio-cassettes. And state-of-the-art CB units for inter-truck communication. Ideal companions on the long haul through the night, or frustrating day-time runs on overcrowded motorways.

Weather and traffic reports, news, and music bring listening pleasure to any truck driver. Leyland bring a range of quality audio units to enhance that pleasure.

That all adds up to a sound investment for any T45 driver.

A. ABU7054 – A commercial vehicle push button radio with 1 Long and 5 Medium Wave stations. Full manual tuning. 7.5 watt peak power output. 24 volt isolated return. Speaker impedance 8 ohms.

B. BBU6131 – A 12 volt radio-cassette with LW/MW/FM stereo and 6 button Prestolock station pre-selection. Stereo cassette player with lockable fast forward and re-wind. Output 2 x 6 watts. A dropper unit will be required with this item when fitted to a 24 volt vehicle system.

C. BBU6132 – LW/MW/FM stereo 12 volt radio-cassette player with electronic push-button pre-selection of up to 12 stations. Automatic station search and electronically accelerated manual tuning on all wavebands. A dropper unit will be required when fitted to a 24 volt vehicle system.

D. BBU6142 – Oval 4 ohms speaker. Kit contains all required fixings, connections, gasket and a 72" lead.

E. BBU6146 – Roof mounted steel aerial.

F. BBU6147 – Roof mounted rubber aerial.

G. BBU6149 – Fitting kit, containing 24" earth lead, 96" battery supply lead, connectors, high density foam pads, suppressors and 12" slotted mounting strip.

H. ACU5924 – Suppressor pack containing 2 x 3 mfd suppressors.

I. HAK8949 – Cab/chassis bond for isolated return vehicles.

J. 10907039 – Dropper unit which steps down voltage from 24 volt to 12 volt to suit items B, C, K and L. A heavy duty version 10907040 is also available and is particularly suitable for isolated return vehicles.

K. BBU6133 – A standard CB radio unit from Rotel. With S/RF meter, LED 40 channel display, transmission indicator and squelch control.

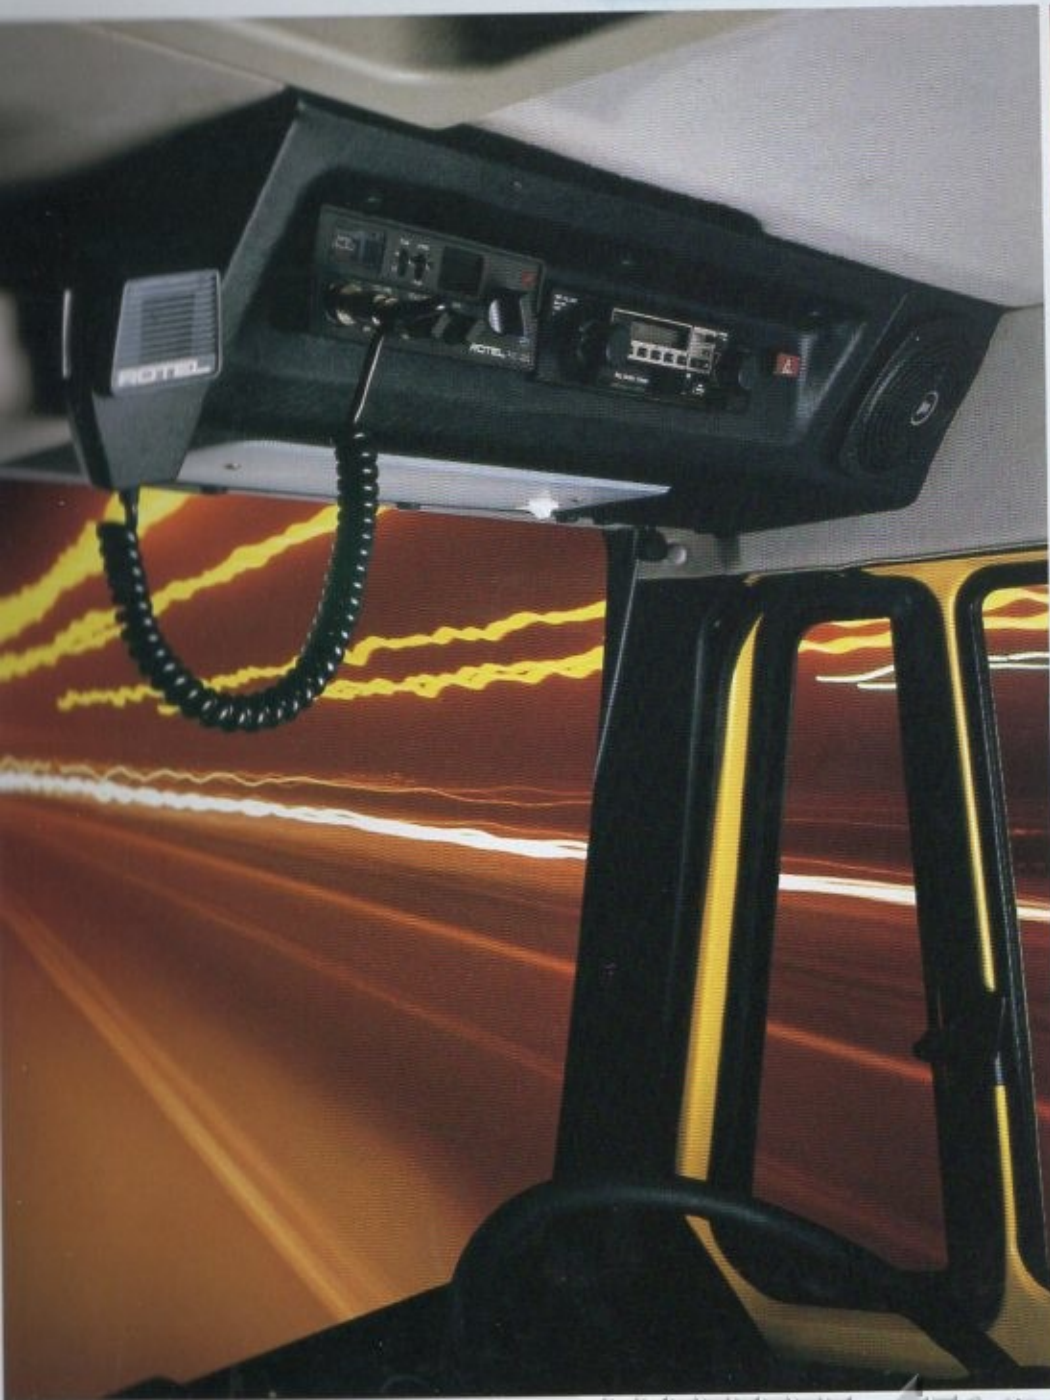

L. BBU6134 – An uprated CB unit with all the features of BBU6133 and additionally, tone switch, front-mounted RF attenuator switch, RF gain control and a P/A switch.

M. BBU6136 – High quality swivel base for omni-directional antenna mounting. Supplied complete with connecting lead.

N. BBU6137 – Compact antenna base adjustable at time of fitting.

O. BBU6138 – Premium quality CB antenna in stylish matt black finish for use with items M or N.

P. BBU6139 / Q. BBU6140 – SWR meter and patch chord for perfect matching of CB antenna to transceiver.

# In Cab Accessories

A range of items specifically selected for safety and comfort within the cab area.

For the driver and co-driver, head restraints, seat covers, arm rests and the all important seat belts provide extra personal comfort throughout the working day. And a comfortable full length bunk with foam mattress and all-around cab curtains provide most of the comforts of home for overnight sleeping in the T45 cab.

Non-slip floor mats, that are easily cleanable, can help keep the cab area tidy whilst a Leyland approved fire extinguisher and first aid kit are safety accessories no driver should be without.

The in-cab accessory range is completed by an emergency windscreen especially designed for the T45 cab, an item which could well prove its worth at the most unexpected moment.

A. ACU2436 – Head restraint for driver and co-driver seats.

B. ACU2433 – Co-driver seat armrest L.H.

C. ACU2434 – Co-driver seat armrest R.H.

D. – Full curtain set for Premium Cab.\*

E. HAH3309 – Seat Belt Kit for driver and co-driver.

F. 10906675 – Driver's seat cover in deep pile simulated lambs wool.

G. 10906676 – Co-driver's seat cover to match item F with armrest cut-outs.

H. 10906611 – 2 Non-slip rubber floor mats each 61cm x 44cm (24" x 17.5"), one with moulded heel pad. Easily cut to shape for exact fit.

I. – Fold down bunk unit for T45 cab.\*

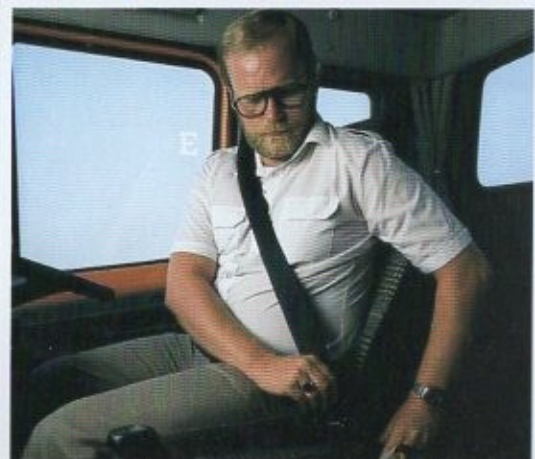

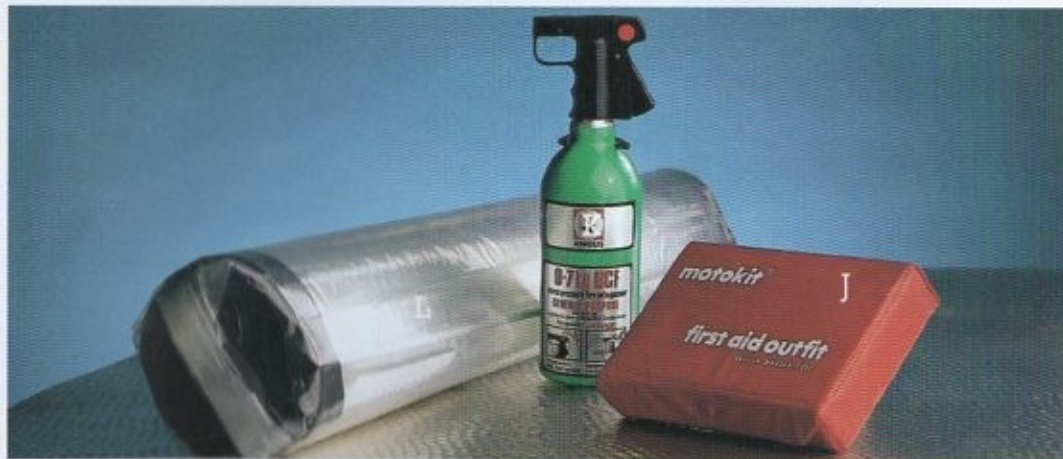

J. 10906605/M – Trucker's first aid kit. Standard requirement for Continental driving. Contains a comprehensive selection of useful first aid items with instructions for roadside use.

K. 10906533 (0.7kg) / 10906534 (1.5kg) – Fire extinguisher. Hand controlled discharge. BCF† model. Non-corrosive, non-residual and non-conductive. Both carry the Fire Officers' Certificate of Approval and can be used with complete confidence.

L. 10906722 – Emergency windscreen – easily fitted temporary screen for short term replacement.

\* Your Leyland Trucks Distributor can supply and fit these items for you.

† BCF is slightly toxic.

# External Cab Customisers

A further selection of Leyland accessories to bring a little individuality for your T45.

For improved styling appeal a series of striping kits in any of 6 colour combinations will complement your paint finish and provide a useful basis for a fleet livery.

The cab appearance can be further enhanced by fitting an illuminated headboard to display your company name.

Supplementary T45 lighting is covered by a series of driving and fog lamps. A combination will suit most lighting requirements throughout the year.

And no external cab accessory list would be complete without a selection of powerful air horns to give a stylish appearance with practical application. The Leyland range caters fully for all requirements with low and high note versions and a twin horn combination in distinctive chrome finish.

A. 10906663 (Yellow), 10906664 (Blue), 10906665 (Green), 10906666 (Red), 10906667 (Grey), 10906668 (Orange) – Striping Transfer Kit in self-adhesive vinyl designed to match or contrast the base colour of the T45 Cab. Each kit contains two colour tones as illustrated.

B. 10911070 – Silver grey bodied Driving Lamp with stainless steel rim suitable for all 24 volt vehicles not requiring insulated earth return. Fitted with 70 watt Halogen H.S. bulb Part No. MBU460.

C. 10911072 – Silver grey Fog Lamp to match item B. Non-insulated earth return 24 volt. Replacement bulb MBU460.

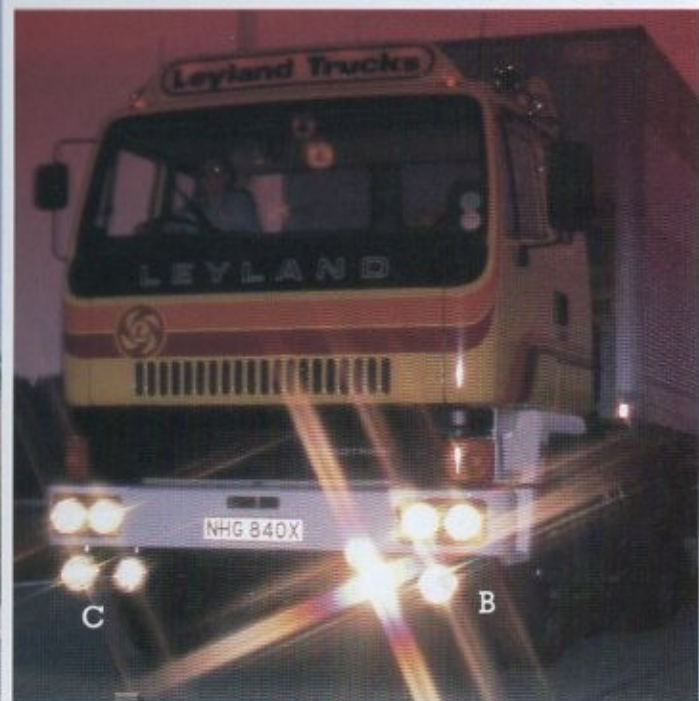

D. ABU7665 – Top quality Air Horn operating from vehicle's compressed air supply. 18cm (7") chrome plated brass trumpet provides low note tone. Supplied with installation kit and can be fitted singly or in pairs.

E. ABU7586 – 15cm (6") high note version of item D.

F. ABU7586 – Twin trumpet Air Horn Set in chrome plated finish. The trumpets are matched to give a high and low note in unison. Supplied complete with installation kit.

G. 10907006 – Illuminated headboard for T45. 24 volt single pole unit with bulbs. A fluorescent tube version is also available Part No. 10907006/1.

# Aerodynamic Aids

Extensive wind tunnel research carried out by Leyland's Advanced Technology Centre has led to the development of a highly effective range of aerodynamic aids for fitment to the T45 Roadtrain range.

**FIG. 1**  
Aerodynamic drag is a very important factor in terms of power requirement particularly at higher speeds. On a high fronted vehicle running at 60 mph, it accounts for approximately 55% of total power.

The Roadtrain roof fairing and under-bumper airdam have been optimised for compatibility with the T45 cab styling, when used with a trailer of overall height between 3.5 and 4.5 metres.

**TYPICAL IMPROVEMENTS IN FUEL CONSUMPTION**

Roof Fairing	9 – 10%
Under-Bumper Airdam	2 – 3%

**FIG. 2**  
When combined, these devices can provide potential fuel savings of 11 – 13% which could mean up to £2,000 per year savings on a vehicle covering 75,000 miles/year.

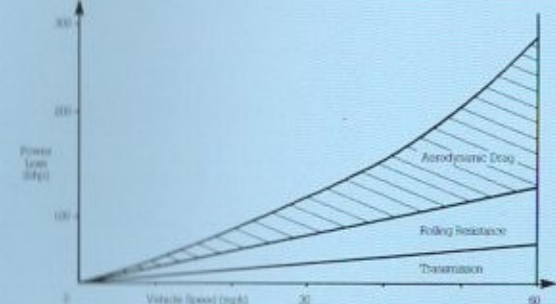

Other benefits include improved vehicle stability in high winds and a significant reduction in spray on wet roads.

Units are manufactured in a high quality glass reinforced plastic (GRP) and gel coated.

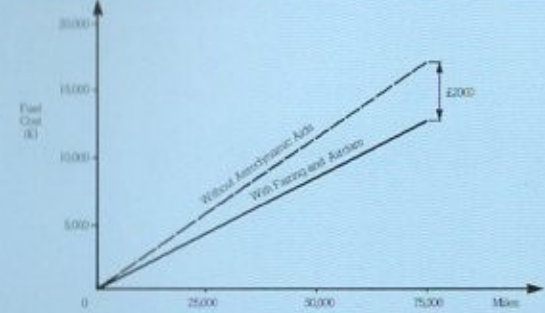

<b>T45 Roadtrain Sleeper Cab</b>	<b>Part Number</b>
Roof mounted Fairing (White*)	BBU6244
Under-bumper Airdam (Black*)	BBU6246

<b>T45 Roadtrain Day Cab</b>	
Roof-mounted Fairing (White*)	BBU6245
Under-bumper Airdam (Black*)	BBU6247

\* Standard colours – Other colours are available to special order.  
**Fig. 1: TYPICAL POWER LOSSES FOR A HIGH FRONTED VEHICLE AT SPEEDS UP TO 60 mph**

**Fig. 2: POTENTIAL £ SAVINGS\* FOR A HIGH FRONTED VEHICLE COVERING UP TO 75,000 MILES/YEAR**

\* Assumes a base consumption for the standard vehicle of 7.5 mpg, a device improvement of 13% and DERV costs of £1.70/gallon.

Each item comes complete with a full fitting kit and easy-to-follow instructions.

**"Truck Magazine" said ...**

"... The most important test result is that with the fairing and the under-bumper airdam, the Roadtrain achieved a 13.5 per cent improvement in fuel consumption, from 7.05 mpg to 8.0 mpg. This is the figure which is likely to be of greatest interest to cost-conscious operators. In fact, with the aerodynamic aids, the Roadtrain with a tilt trailer was only 0.22 mpg thirstier than with a flat trailer at the same weight, over the same stretch of motorway ...

"... There was no doubt that on our test, the aerodynamic devices behaved pretty much as predicted, and that an improvement in fuel consumption of the order of 13.5 per cent is significant, particularly as we took considerable pains to ensure that we eliminated any other variables from our two runs ...

"... We are confident that the improvement in fuel figures was a result of the fitting of the Multipart roof fairing and airdam, and an improvement of 13.5 per cent is well worth the price of the equipment ..."

NOVEMBER 1983.

The ultimate accessory for all T45 drivers. A superbly tailored range of clothing with prominent T45 identity, especially designed and exclusive to Leyland Trucks. Each item in the range is made in Britain to a very high quality standard.

Prices however, have been kept as low as possible to make the garments superb value for money. Your Leyland Trucks Distributor carries special order forms for all T45 clothing, or order forms can be obtained direct from:-

Move up to top gear today – with Leyland.

## MS1 – DRIVER'S COAT.

This thigh length coat is designed to be worn over bulky clothing or a jacket, and is ideal for day long work wear. The high specification includes patch pockets with 'hand warmers', zipped and press stud front fastening, ribbed cloth finish collar and even a handy inside zipped pocket.  
Sizes available: 38", 40", 42", 44", 46".

## MS2 – BOMBER JACKET

A superb casual jacket especially suited to truck driving. The styled anorak will keep you warm with matching windproof knitted cuffs, collar and waistband. Finished in black with T45 identity on a

single grey chest stripe.  
Sizes available: 36", 38", 40", 42", 44".

## MS3 – LIGHTWEIGHT JACKET

More suited to warmer weather, this fully lined jacket carries all the features of the bomber jacket but without the padded warmth filler. Just the job for a visit to the local on a warm summer's evening.  
Sizes available: 36", 38", 40", 42", 44".

## MS4 – WAISTCOAT BODYWARMER

The T45 waistcoat is designed for those who require warmth but prefer their arms free for action. Zip fronted with slanted pockets the style complements the other garments in the range with its distinctive T45 stripe and personalised Leyland Trucks lining.  
Sizes available: 36", 38", 40", 42", 44".

## MS5 – TRUCKER'S CAP

Hats off to Leyland for their stylish T45 'engineers' cap. Finished in plain black with discreet grey piping around the peak, an adjustable press stud fitting band enables one size to suit anyone.
